

Comments

- Comments can be used to explain Python code.
- Comments can be used to make the code more readable.
- Comments can be used to prevent execution when testing code.

Creating a Comment

Comments starts with a `#`, and Python will ignore them:

Example

```
#This is a comment  
print("Hello, World!")
```

[Try it Yourself »](#)

Comments can be placed at the end of a line, and Python

Example

```
print("Hello, World!") #This is a comment
```
